Prime Graphics Completes Climate-Controlled Expansion for Shrink Sleeve Manufacturing

(Wood Dale, Ill., September 24, 2007) - Prime Graphics, Inc., a market-leading provider of innovative decorative packaging solutions, announces the completion of a 3,500 square foot climate-controlled build out dedicated to the manufacturing of shrink sleeves.

“Through our continued investment in the best people, equipment, and now our climate-controlled dedicated manufacturing environment, Prime Graphics is rapidly taking a leadership position in shrink sleeve manufacturing,” said Bill Hunter, President of Prime Graphics.

“Shrink sleeve technology provides a unique combination of features such as added security, flexibility, and increased product differentiation. We are being successful because we get involved in the packaging process early with our customers. We take the time to understand our clients’ needs in order to assure their expectations are fully realized,” added Cy Harris, Vice President of Sales and Marketing.

Prime Graphics is experienced with a wide variety of film materials including PET/PETg LV, PVC, and OPS, as well as earth-friendly, sustainable alternatives such as PLA (a corn-based film). For more information on Prime Graphics please contact 1-630-227-1300 or visit www.primegraphicsinc.com.
